§ I THE CHALLENGE

Context

A massive digital-payments ecosystem with multiple integrated fintech partners needed validation at a scale most UAT programmes never encounter. Merchant onboarding, payment processing, and multi-currency settlement workflows all had to clear acceptance simultaneously – with partners on different release cadences and risk appetites.

§ II THE APPROACH

Method

Qualitrix orchestrated UAT at unprecedented breadth – five hundred-plus merchant partners coordinated against a two-million transaction-per-day simulation, multi-currency settlement validation, and a deep catalogue of risk scenarios stress-tested before any partner saw production.

“Five hundred partners. One launch. No exceptions.”

— ENGAGEMENT LEAD, QUALITRIX QE

§ III BUSINESS IMPACT

Outcomes

- 01** — Successful rollout serving more than five hundred merchant partners.
- 02** — Two million-plus daily transactions validated across all workflows.
- 03** — Zero settlement discrepancies and zero fraud incidents post-launch.
- 04** — Partner satisfaction score recorded at 9.2 of 10.
